

AlphaPepe

Alpha Intelligence Layer
for DEX Trading

WHITEPAPER

Cryptocurrency investments carry significant risk, including the potential loss of capital.
Please conduct your own research and only invest what you can afford to lose.

Last Updated: **22/03/2026**

ABSTRACT

AlphaPepe is an AI-powered intelligence layer for DEX trading that helps users navigate on-chain markets with greater clarity and speed. By combining real-time data aggregation, predictive analytics, and actionable trading insights, AlphaPepe reduces information fragmentation across decentralized exchanges and supports smarter decision-making. The platform is designed to improve market visibility, execution efficiency, and strategic positioning, while the \$ALPE token powers ecosystem access, incentives, and future governance.

ABOUT ALPHAPEPE

THE PROBLEM

Most DEXs are built for execution, not intelligence. Users can swap instantly, but often without enough context to judge risk or quality.

THE SOLUTION

AlphaSwap adds an AI-powered intelligence layer to the swap experience, helping users evaluate tokens before execution and trade with more clarity.

ALPHASWAP AT THE CENTER

AlphaSwap is the core product of the AlphaPepe ecosystem, bringing intelligence directly into the DEX trading experience. It combines execution, analysis, and market context in a single interface, allowing users to make more informed decisions before every swap.

AI PRE-SWAP ANALYSIS

Before every trade, AlphaSwap displays an intelligence card that helps users evaluate a token before execution. This brings risk awareness directly into the swap flow.

The analysis highlights the signals that matter most at the point of decision, making it easier to assess a token without leaving the interface.

✓ **Contract Safety**

Checks ownership, mintability, proxy status, and honeypot risk.

✓ **Holder Distribution**

Shows whether supply is broad or concentrated.

✓ **Liquidity Status**

Indicates whether liquidity appears stable or vulnerable.

✓ **Deployer History**

Reviews the background of the deploying wallet.

INTELLIGENCE LAYER

AlphaSwap DEX extends beyond execution by integrating live market intelligence directly into the trading interface. This gives users broader context around narratives, sentiment, and capital movement while making decisions.

Breaking News Ticker

Real-time market events, exploits, whale alerts, and narrative shifts.

Trending Tokens

Momentum-driven tokens with filtering and safety context.

AI Daily Briefing

A concise summary of key market developments, risks, and opportunities.

INTELLIGENCE LAYER

- ✓ **Intelligence News Feed**
Categorised, sentiment-tagged updates that provide clear market context.
- ✓ **Social Pulse**
Curated insights from key market participants, filtered for signal over noise.
- ✓ **Whale Activity**
Tracks high-value wallets to reveal accumulation and distribution patterns.

ALPHA TOKENOMICS

Total Supply: 1,000,000,000 ALPE

Network: Binance Smart Chain

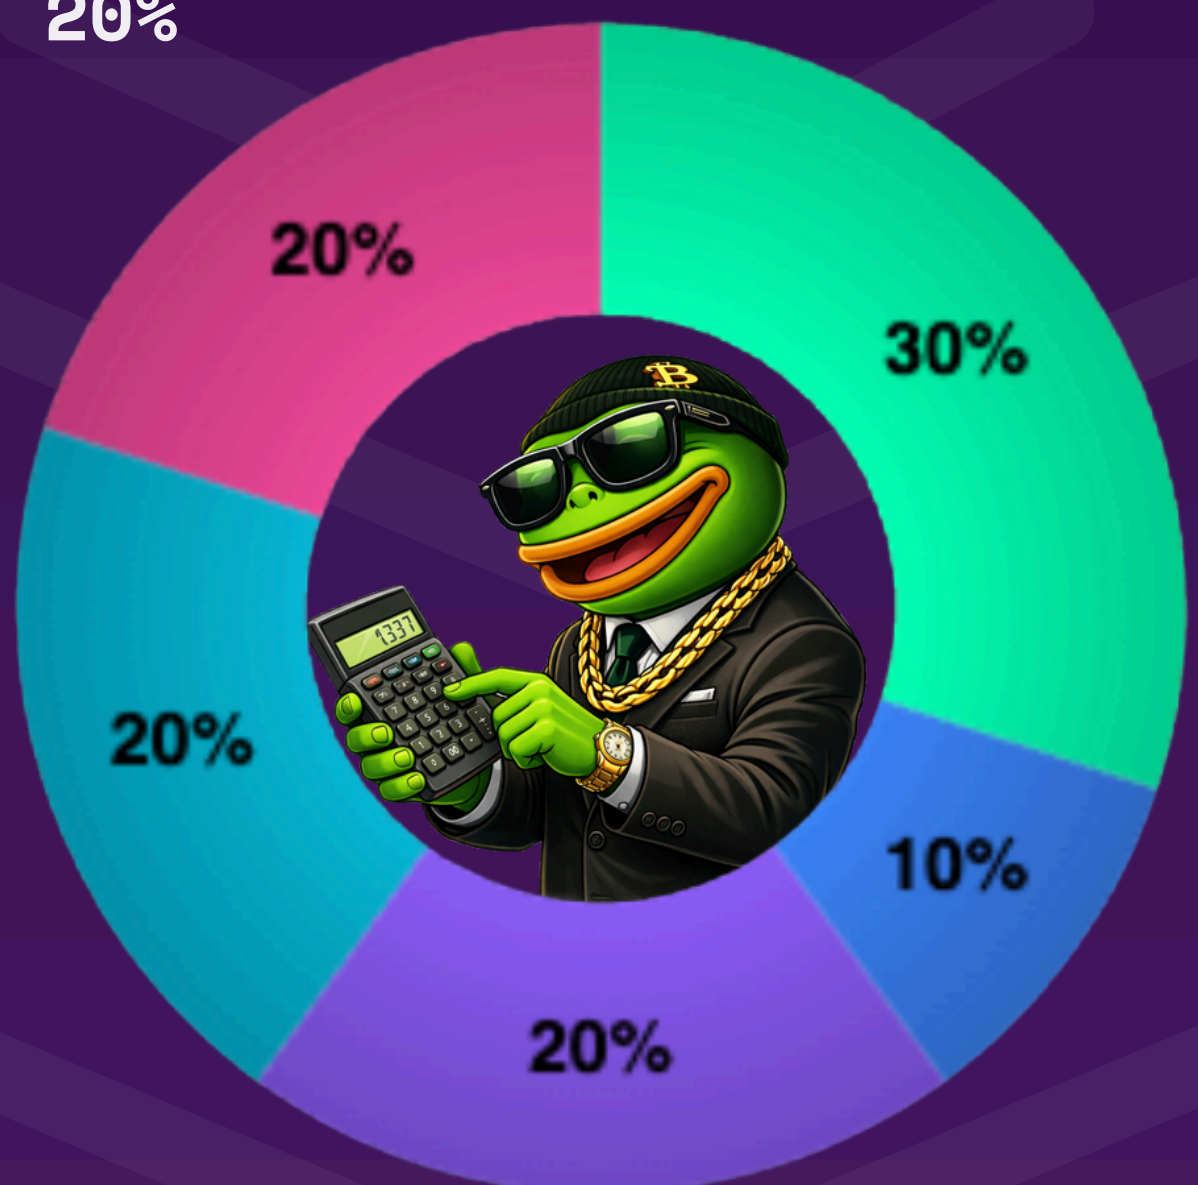

AlphaPepe uses a balanced token allocation designed to support growth, liquidity, development, and community participation.

- **Presale** – 30%
- **Liquidity** – 10%
- **Marketing** – 20%
- **Development** – 20%
- **Community & DAO** – 20%

5% buy/sell tax:

1% development & marketing

4% redistributed to holders

ROADMAP

AlphaPepe follows a structured development path focused on product delivery, ecosystem growth, and long-term sustainability, reflecting its evolution from a meme-driven concept into an advanced AI-powered ecosystem.

Phase 1: AlphaPepe Launch & Foundation

Presale launch, website rollout, smart contract audit, BSC deployment, and early community growth.

Phase 2: AlphaPepe Ecosystem Launch

AlphaPalace, AlphaGems, rank system, staking rewards, holder rewards, and marketing expansion.

Phase 3: AlphaSwap Launch & Initial Intelligence Rollout

AlphaSwap goes live alongside the first stage of the intelligence layer, including core AI-driven trading support and early analytical features.

Phase 4: Listings, Expansion & Full Intelligence Layer Rollout

PancakeSwap liquidity, CoinMarketCap and CoinGecko listings, CEX listings, expanded market presence, and full intelligence layer deployment.

Phase 5: DAO & Ecosystem Development

Governance rollout, strategic partnerships, and continued ecosystem growth.

ECOSYSTEM

Instant Delivery & Staking

AlphaPepe is designed for immediate participation. Tokens are delivered instantly, with no separate claiming process required after purchase.

The ecosystem also includes flexible staking options for long-term holders, with multiple pool structures designed to support different participation preferences and reward profiles. Staking rewards are paid in \$ALPE, with pool terms and incentive models evolving alongside the broader ecosystem.

ECOSYSTEM (CONT.)

USDT Pools

AlphaPepe includes a monthly USDT Pool designed to reward active participation. A defined percentage of monthly buys is allocated to the pool.

At the end of each month, 80% of the pool is distributed among the top 10 buyers, while the remaining 20% is shared equally among 30 randomly selected buyers.

This structure rewards both high-conviction participation and broader community engagement.

ECOSYSTEM (CONT.)

AlphaGems & Ranks

AlphaGems are the core in-platform currency of the AlphaPepe ecosystem. They are used to increase rank and unlock deeper access inside AlphaPalace.

Users can earn Gems through ALPE purchases, referrals, monthly USDT pool participation, and Zealy quests. Ranks determine progression within the ecosystem, with higher tiers unlocking additional access and rewards.

Gems are not passively distributed. They are earned through active participation.

SECURITY & AUDIT

AlphaPepe smart contracts have been audited by BlockSAFU, achieving a 10/10 audit score. This reflects a strong focus on security, reliability, and safe deployment practices.

Full audit details are available on the official website.

CONCLUSION

AlphaPepe introduces an intelligence-driven approach to decentralized trading through AlphaSwap and its ecosystem.

By improving how users access information and execute decisions, the project aims to shape a more efficient and informed future for DEX participation.

RISK DISCLAIMER

This whitepaper is provided for informational purposes only and does not constitute financial, legal, tax, or investment advice. Participation in blockchain-based ecosystems involves risk, including market volatility, regulatory uncertainty, smart contract vulnerabilities, and potential loss of funds. Nothing in this document should be interpreted as a guarantee of future performance, returns, or outcomes. Users should conduct their own research and assess all risks carefully before participating in the AlphaPepe ecosystem.
